

NBA Hoops New ball gate

If your game NBA Hoops or Hoop Fever game was purchased prior to 2015 the ball gate will be shorter than the version that we currently produce. To determine the difference you can measure the length, the older revision of ball gate measures 29 3/8 inches long, the current production ball gate measures 29 1/4 inches. If replacing an older ball gate you will have to replace the ball gate bearing (ICE part number BB3018) and add a spacer plug (ICE part number BT1022A)
