

How to clean NBA Hoops or Hoop Fever

General cleaning first. You should start by thoroughly cleaning the game with a solution of soapy water. Most dish soaps are not designed to kill bacteria or viruses. This is to only remove the grease and dirt from the game. Do not pour the solution directly on the game but use a clean rag, dip; twist (to remove excessive moisture), and scrub until clean.

Damage will occur if you directly pour liquid on your game.

Be sure to clean the control panel, ball return area, and front podium.

Disinfect the game by wiping down the following parts:

control panel - all buttons.

Front podium - coin entry, coin reject and DBV areas, ticket dispensing area.

Top of podium - both wood and metal

Control panel - All buttons

LET EVERYTHING AIR DRY.

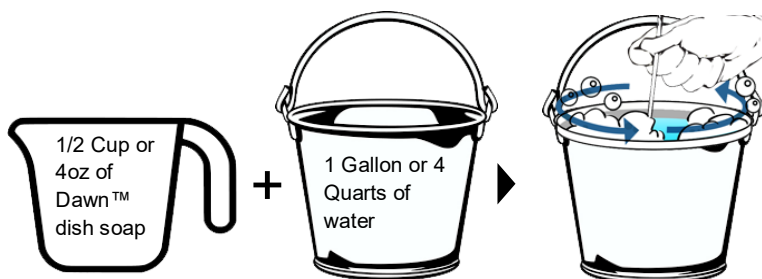

See the section on how to clean and sanitize the basket balls.

Sanitize frequently!

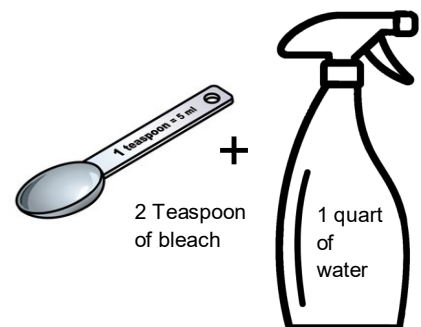

Wipe all areas at the front where the player could come in contact with during game play.

*** Wear eye and hand protection when handling bleach products.**

How to make a 1 gallon of soapy water (discard after use).
